AMENDMENT IN REPLY TO ACTION OF DECEMBER 14, 2005

Please amend the above-identified application as follows:

Amendments to the Specification begin at page 2 of this paper.

Amendments to the Claims are reflected in the listing of claims which begins on page 3 of this paper.

Remarks/Arguments begin on page 19 of this paper.

Amendments to the Specification

Please replace the paragraph beginning at page 20, line 16 with the following amended paragraph:

Next, the CPU 2406 stops the picture signal processing circuit 2407 in the CPU 2406 and the [[VARM]] VRAM 2411. As described above, since the display device 2413 carries out a display by using the picture data stored in the inner memory circuits, it is not necessary to newly send picture data to the display device. Thus, it does not matter if the picture signal processing circuit 2407, the [[VARM]] VRAM 2411 and the like which generate and process picture data do not operate.

Please replace the paragraph beginning at page 20, line 22 with the following amended paragraph:

That is, it is possible to stop the operation of the picture signal processing circuit 2407, the [[VARM]] VRAM 2411 and the like.
